THE EVOLUTION OF GAMING

Engaging the Next Generation of eSports,
On the Blockchain with PG Token.

Introduction

"eSports is prime real estate for custom currency. Gamers are already used to purchasing credits on gaming platforms and inside games, as well as on streaming platforms. Gamers also tend to be early adopters of new technology."

-Sports Insider

Sports and the Cryptocurrency Market

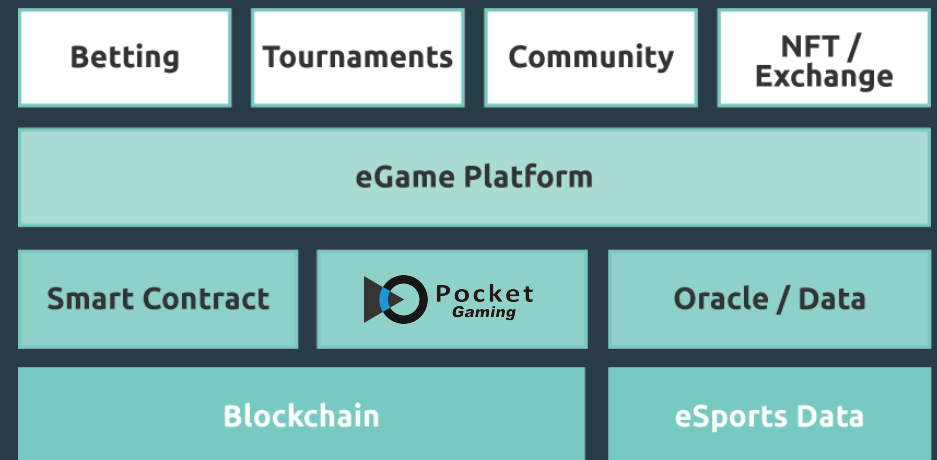

The rapidly growing industry known as eSports has redefined the term “sports” with hundreds of million of views world-wide and market size in the hundreds of millions. Consisting of a younger demographic that is technically savvy and cryptocurrency supportive, the combination of eSports and cryptocurrency is set to take the sports market by storm.

eGame Platform

The eGame platform technology integration for the expansion and promotion of eSports

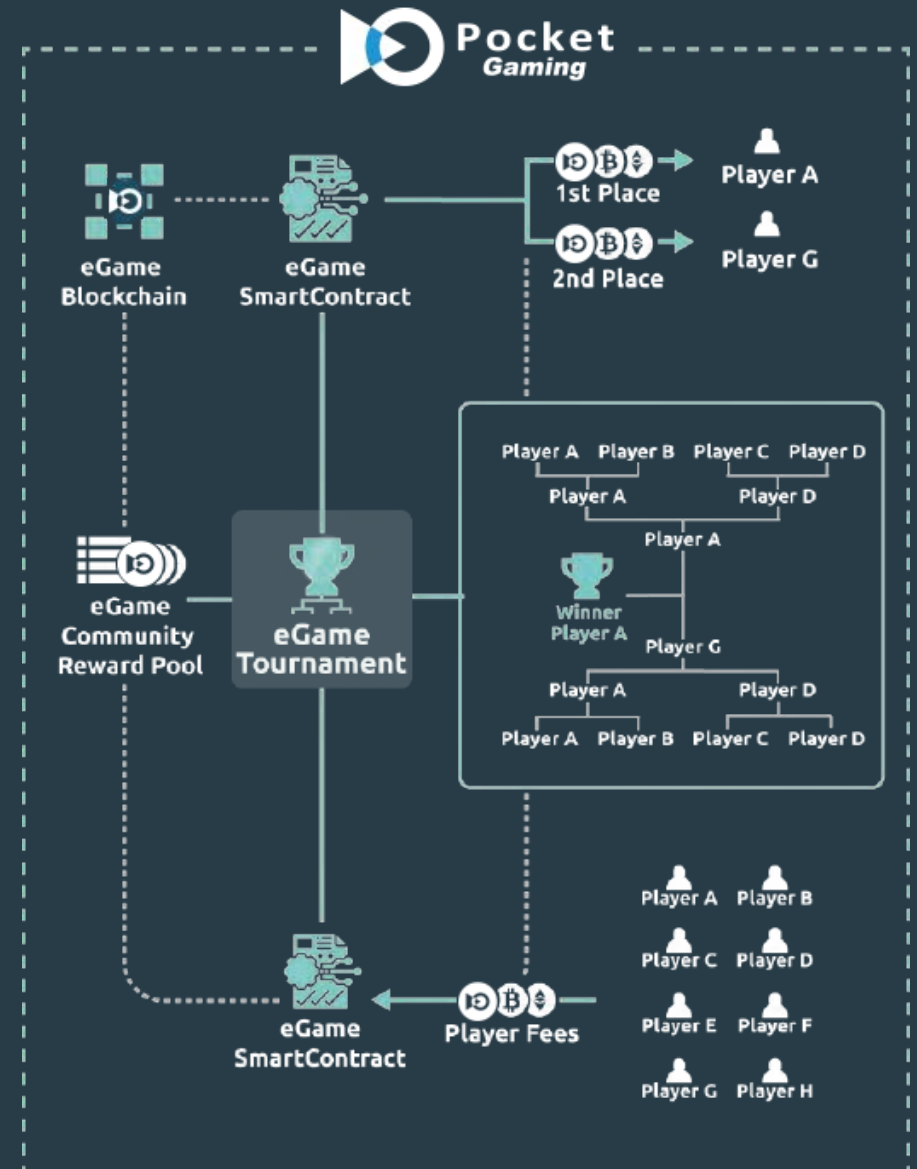

The eGame platform is built on blockchain technology, thus enabling smart contract technology and the native eGame token PG usage across a range of features available to eSports players and fans.

eSports Tournaments

Tournaments are a vital source of revenue for all eSports players, as well as essential promotional tools for the eSports sponsors.

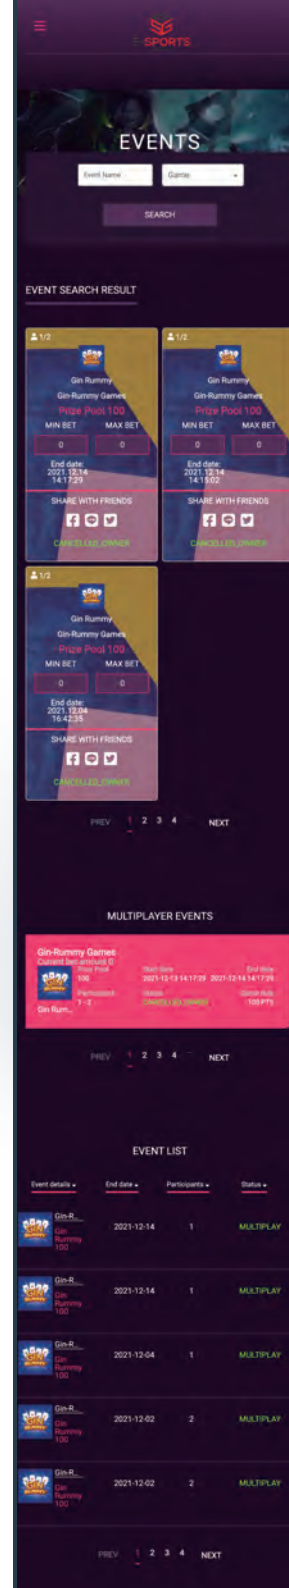

The eGame platform is powered by the blockchain and smart contracts, promoting tournaments to help foster the growth of eSports.

Community Engagement

Community is essential in eSports. eGame enables teams or individual players to create their own moderated communities where they interact with their fans.

By implementing smart contract technology with cryptocurrency, community creators incentivize

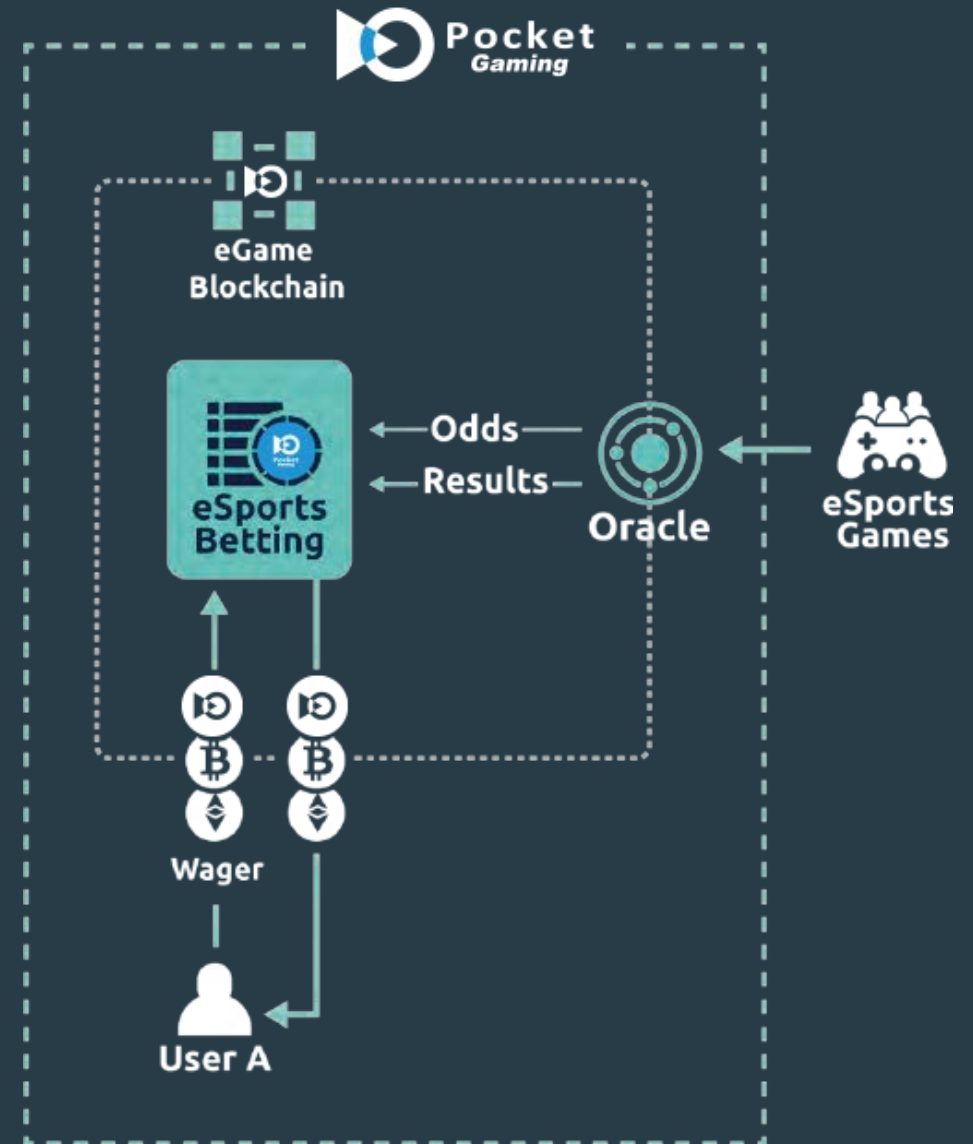

eSports Betting Features

House Bets

The eGame platform offers odds and takes bets on tournaments, events, and select matches.

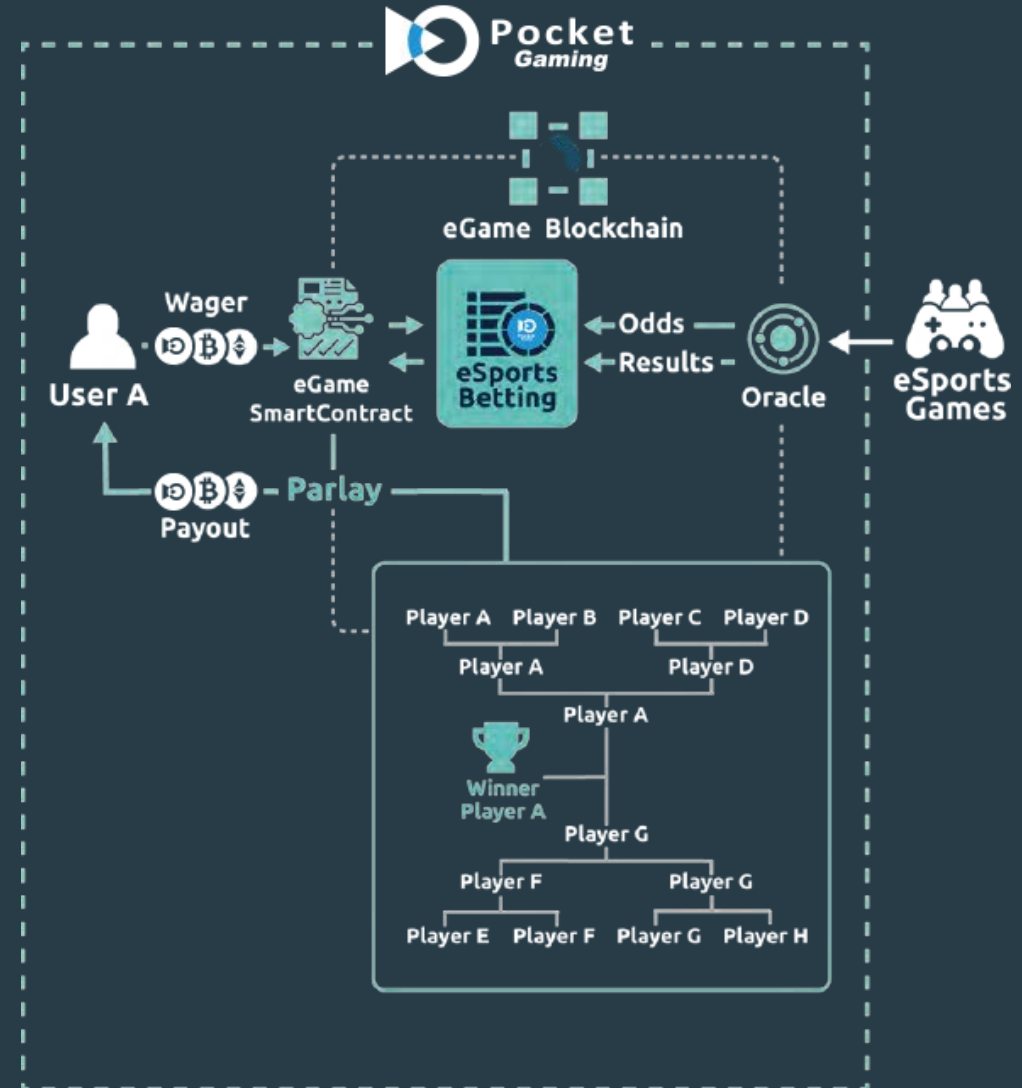

Bets and payout are in the PG token with the option to wager instead using one of the major cryptocurrencies.

Exclusive Bets

Players in good standing with a minimum PG balance may place Exclusive Bets that can lead to higher payouts as they continue to accrue wagers across multiple matches or tournaments, known commonly as a parlay.

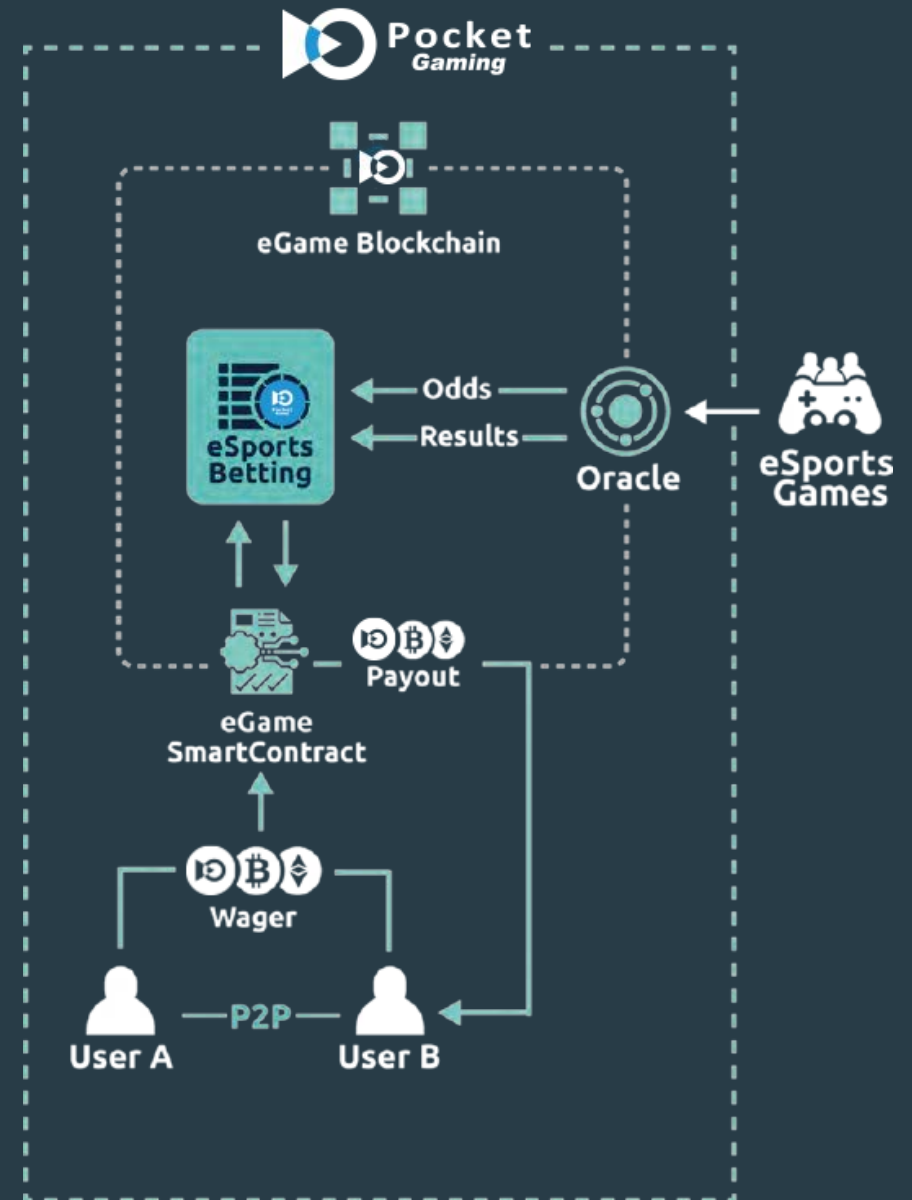

if the bettor wins all of the bets with in the parlay, the bettor receives a much higher payout.

P2P Bets

Individual users may directly place bets with one another on matches and tournaments with the option enabled.

Player-to-Player(P2P) bets are secured via smart contract technology and meticulous in-house moderation.

NFT Exchange

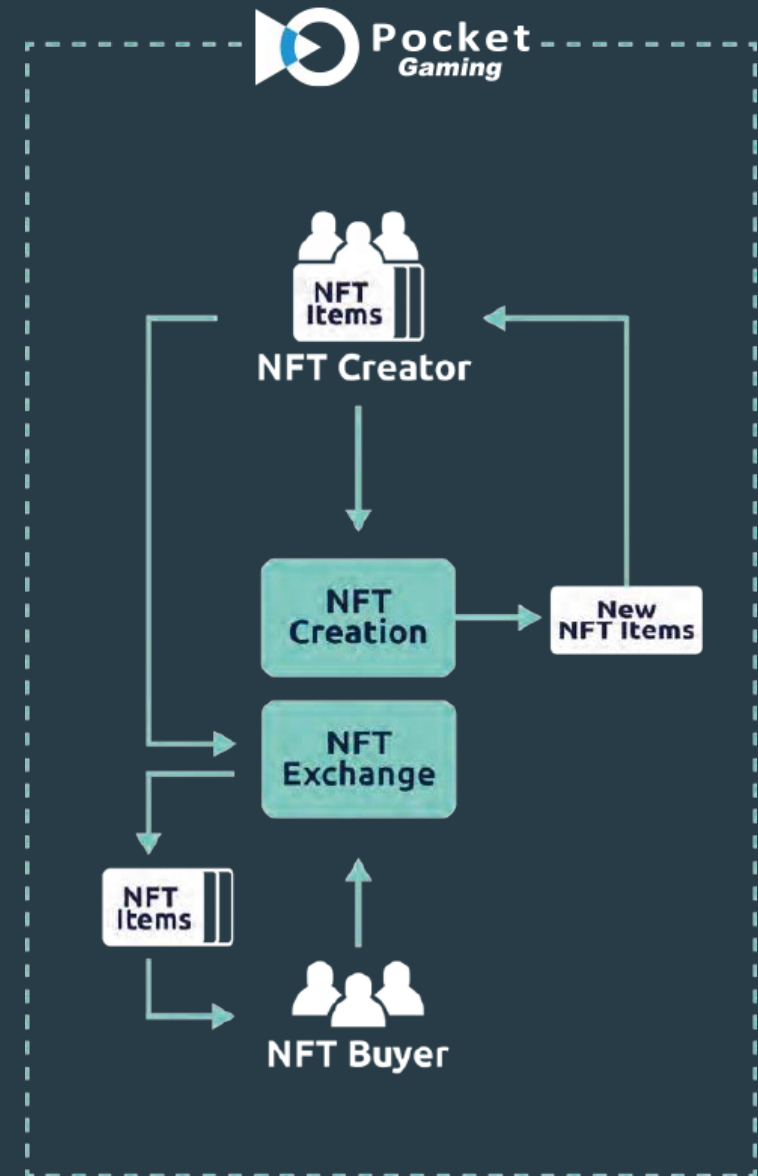

A non-fungible token, or NFT, is a digital good, usually a media file such as an image or video, which is inextricably linked to a digital hash on the blockchain which affirms the actual owner of the original property.

NFT Creation

Through the platform players can create their own NFTs. It can be images or even video during a game. (Memorable events captured via NFT)

NFT Trading Platform

NFT creators and traders can then auction their NFTs on the NFT Trading platform.

PG Staking

eGame allows users to get more engaged with the platform through PG staking models. By staking, PG users can get access to Exclusive Bets and be more involved in communities, allowing them to earn PG rewards.
